

Materials

2 Bowls
Cling-film
Newspaper
White paper
Tissue paper
Paste
Ribbon

Steps

The two small bowls need to have the same size opening, alternatively you can use just one bowl and make one half first and the second half later. Cover the bowls with cling-film.

Glue strips of newspaper onto the bowl and leave to dry. When it is dry carefully remove the bowl and cling-film and leave it to dry on the inside as well..

Add a layer of white paper so that no newsprint will show through the final tissue paper layer.

Use layers of strong packing tape to make a hinge to join the two halves of the egg.

I suggest making a small lip on the outside of one half so that it fits a tiny bit over the other half - this helps hold it together. Finish the outside with a layer of torn tissue paper.

Glue a ribbon to the bottom so that the egg can be kept closed with a bow.
