

Materials

Paper strip
Scissors

Steps

Any size strip of paper will do - it just needs to be long enough that you can fold it into at least 6 and have room to draw a picture.

Fold the strip of paper into a concertina.

Draw a picture on the top face of the folded up paper. The picture must go to each side of the paper. Any shape is fine as long as it joins on the sides.

Cut the shape out through all the layers, making sure that the sides are not cut out.

Open it out you should have lots of shapes all in a row.

Decorate each shape as you wish.
