

Materials

- Paper
- Scissors
- Pen
- Sticky tape
- Pipe Cleaners

Steps

The basis of these lilies are a hand shape. So the first step is to trace around a hand and cut the shape out.

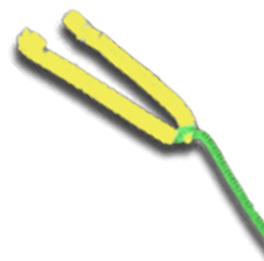

Roll the hand into a cone shape and tape it near the base. Leave a small hole at the bottom of the cone shape.

Wrap each finger around a pen ...

... to curl the petals.

Twist the end of a green piece of pipe cleaner around the middle of a short piece of pipe cleaner. Fold that short piece up and curl over at each end.

Push the pipe cleaner stalk through the lily to make the stalk and stamen.
