

Materials

Paper
Scissors
Sticky tape

Steps

Cut slits in an oblong piece of paper, about three-quarters of the way across the paper.

Roll up the paper and secure the roll at the bottom with a piece of tape.

Carefully pull up the center of the tree to bring the 'branches' up.

Arrange the branches by bending them, rolling them and cutting extra slits in them.

To make a stand for the tree cut a circle out of paper or thin card. Cut a slit to the center and then a circle from the center about the size of the tree trunk.

Form a cone around the base of the tree and secure it with tape. You can also make a trunk for the tree with another piece of paper decorated with crayon rubbings.
