

## Materials

- Paint
- Paper
- Scraping tools
  - pieces of card
  - end of brush
  - fingers

## Steps

To make a more dramatic scraped paint image, first coat the paper with a base layer of acrylic paint. If you are using just one layer of paint and scraping through to the paper, then any sort of paint is fine.

Once the first layer is dry paint a small area on top. I have painted and scraped each stripe before starting the next one.

While the paint is still wet scrape into the paint with a tool, like the end of a paint brush or a piece of card.

You can scrape patterns or words into the wet paint.

Cut bits from the finished piece for all sorts of paper crafts.
