

Materials

Colored paper
Scissors
Pencil
Ruler

Steps

Cut a square from a sheet of colored paper, we used photocopy sized paper. Fold the square sheet of paper in half. Fold each side in half so you end up with a zig zag fold in the paper.

Flatten all the folds so you are left with a skinny rectangle. On the first section fold the corners in on a diagonal to form a triangle.

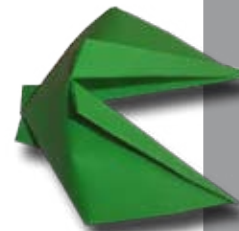

Repeat this on the middle section and then again on the last section so that all the sections are folded to the same shape.

Find the center point on the longest side and using a pencil make a mark about 12 mm (0.5") in from the edge. Cut up to the mark through all the layers of paper.

Fold back long triangles from the cut to the outer point. This creates the lips or gums of the snapper. Pull the sides apart.

Fold over so the points meet and make a beak or mouth shape. Pinch the back of this to encourage it to stay folded so it does keep springing fully open.

Decorate to create your creature, this one has white card for the teeth and a curly tongue from red paper.
